Post-doc position at Institute of Computer Science, University of Wroclaw, Poland.

The position is within the project "Aspects of grammar compression" led by Artur Jeż; the project focuses on text and tree grammar compression and its connections with other fields, say text algorithms, word equations or term unification.

The position is for 1 year. The starting date is flexible; the academic year starts on 1st October and this a default date.

The position is a full-time employment under a contract (*not* a scholarship) The salary is around 6200 PLN *after taxes* (this is a bit more than 1300 EUR and approximately 1.4 average salary in Poland), plus a yearly bonus. This allows for a comfortable living in Poland. It provides basic health and social insurance.

The position comes with a travel support for conferences etc.

The position comes without a teaching load included; however, teaching can be organized upon explicit request.

The candidate should hold (or be about to obtain) a PhD in Computer Science or a closely related field. Preference will be given to candidates with research record related to topic of the project.

Application should include

- curriculum vitae;

- PhD diploma (or a convincing argument that it should be obtained in near future);

- list of publications;

- short description of research interests and previous scientific work;

- email address to (at least one, preferably two) researchers who can provide recommendation letters for the applicant;

- (for legal reasons: a consent to processing of your personal data).

Applications should be submitted to Artur Jeż via email artur.jez@uwr.edu.pl by 15th May. The results should be available by the end of May.

For any further questions please contact Artur Jeż at artur.jez@uwr.edu.pl.
