

Postdoc position in approximation algorithms.

We are looking for a candidate for a postdoc position at the Combinatorial Optimization Group, Institute of Computer Science, University of Wrocław. The position is within the project “Algorithms for connectivity under uncertainty” directed by Jaroslaw Byrka. The employment is planned for the period of two years starting in September 2021 or later.

Candidates are expected to be enthusiasts of theoretical research in algorithms. Preference will be given to candidates who have already obtained important scientific results related to the scope of the project. Applications should include:

- CV
- PhD Diploma
- A short description of the already obtained results and general research interests
- A recommendation letter

The deadline for application is July 25.

Further questions and applications should be send to
Jaroslaw Byrka (jby [at] cs [dot] uni [dot] wroc [dot] pl)
