

**One post-doc position
in Combinatorial Optimization Group,
Institute of Computer Science, University of Wrocław.**

The position is within the project “Algorithmic fundamentals of supply chain networks” led by Jarosław Byrka. It aims at developing algorithmic tools for typically NP-hard optimization problems in network design such as routing or clustering.

The position is for 18 months. The preferred starting date is September or October 2019. The gross salary is approximately 5450PLN, which is above the Polish average salary and allows for a comfortable living in Wrocław. It also includes a basic health insurance and an end-of-year benefit. Sufficient travel funding will also be available.

The candidate should hold (or be about to obtain) a PhD in Computer Science, Mathematics, or a closely related field. Preference will be given to external candidates, who have (co-authored) nontrivial results in the field of combinatorial optimization.

An application should include:

- curriculum vitae
- diploma
- list of publications
- short description of selected obtained results and general research interests

Our group offers a stimulating working environment,

see: <http://ii.uni.wroc.pl/badania/zaklad/ZOK>

Wrocław is a modern city, pleasant to live in, with over 100 000 students.

Applications should be submitted by Jun 3, 2019.

Further questions and applications should be send to Jaroslaw Byrka (jaroslaw.byrka [at] cs [dot] uni [dot] wroc [dot] pl).
